Bridge between models & reality

Tools

Performs on your behalf as Actions

Resources

Delivers structured context with Data

Prompts

Controls any output using Templates

modelcontextprotocol.io

Model Context Protocol

Standard to connect `AI` apps to external systems created in 2024 by **Anthropic**

Servers for `Tools`, define `Resources` & supply `Prompts` to **Clients**

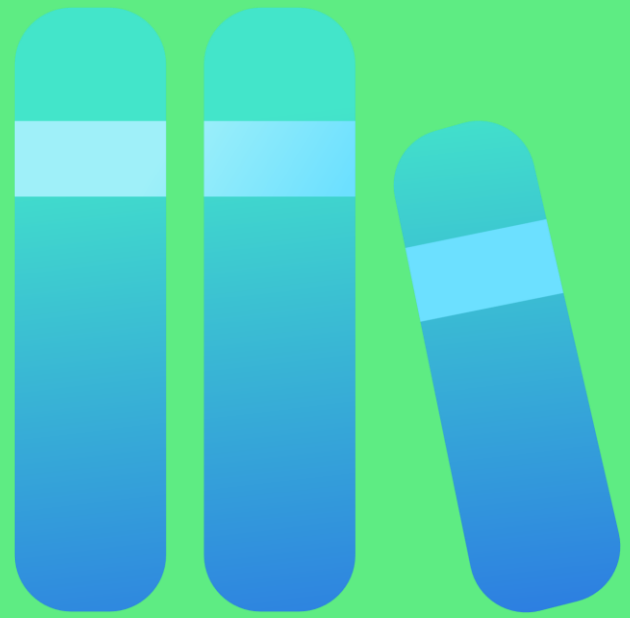

Clients like `GitHub Copilot` leverage **Servers**

Skills

Reusable capabilities enable `AI` clients to perform specialised tasks

Workflows combine actions from `Tools` & knowledge from `Resources`

Servers will provide `Skills` over `MCP` to supported **Clients**

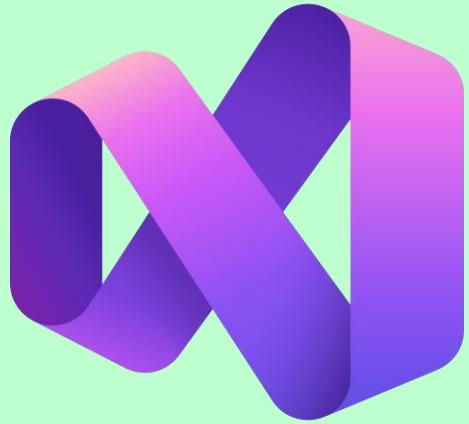

Coming Soon

Build, connect & leverage

Build

.NET & C# MCP SDK
